

Austins At Avalon – recently the Wellington Branch visited the Avalon Fire Station and came away with even more respect for the superb job our Fire Service do for us all. 2026

From Bill Studd, Branch Organiser – “Our Host was Peter Walker and this visit organised by VAR member Alan Thompson who is an expert in fire control regulations and professional requirements.

Such a fascinating visit and to learn about their extensive responsibilities with calls to every medical alert, traffic incident as well as the fire incidents.

These chaps have extensive training and need to respond within a few minutes to every call.

Their fire engines are packed with technology and equipment to deal with every type of incident you can imagine !

Peter explained the on site responsibilities of each of the four personnel in the Engine and demonstrated the various rescue equipment.

Much appreciated visit and the Fire Service activity should be more widely advertised”.
